TECHNOLOGY, APPLICATIONS & ION PHYSICS

The international journal and abstracting service for vacuum science and technology and their application in research and industry

Contributors
Manuscripts should be submitted in duplicate to the appropriate ASSISTANT EDITOR or to the Editor-in-Chief at the address given below. Details of style are on the inside rear cover

EDITOR-IN-CHIEF
John S Colligon, *Electronic & Electrical Engineering, University of Salford, Salford M5 4WT, UK (Tel: 061-736 5843 ext 7283, Telex: 668680 SULIB)*

Assistant Editor (Ion Implantation)
W A Grant, *Electronic & Electrical Engineering, University of Salford, Salford M5 4WT, UK*

(Address for all manuscripts on the various aspects of ion implantation, machines, ion sources, vacuum chambers, interaction of energetic ions/electrons with surfaces, sorption, desorption, chemical, mechanical and electrical effects of implantation)

Assistant Editor (Surface Science Instrumentation)
J M Walls, *VG Ionex Ltd, Charles Avenue, Maltings Park, Burgess Hill, West Sussex RH15 9TQ, UK*

(Address for all manuscripts on surface science instrumentation for analysis including quadrupole analysers, mass and energy analysers, SIMS, ESCA, photon emission, Auger techniques, low energy ion scattering, SEM)

Abstracts & Vacuum Products Survey Editor
H Kheyrandish, *Electronic & Electrical Engineering University of Salford, Salford, M5 4WT, UK*

Assistant Editor (Thin Films & Plasma Processing)
L Holland, *Hazelwood, Balcombe Road, Pound Hill, Crawley, West Sussex RH10 2NZ, UK*

(Address for all manuscripts relating to the interaction of plasmas with surfaces, ion plating, thin film deposition, sputtering, surface treatments, gas discharges)

Assistant Editor (Vacuum Technology)
R S Calder, *CERNCH-1211, Geneva, Switzerland*

(Address for all manuscripts on pumping, sealing, monitoring, kinetic theory, drying, metallurgy and chemical engineering)

North American Editor
G P Williams, *National Synchrotron Light Source, Brookhaven National Laboratory, Upton, NY 11973, USA*

(Address for all manuscripts from Authors based in N America)

Australasian Editor
J L Robins, *Department of Physics, The University of Western Australia, Nedlands, W Australia 6009*

(Address for all manuscripts from authors based in Australasia)

US Copyright Law Applicable to Users in the USA
Photocopying information for users in the USA: The Item-Fee Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying beyond that permitted by Section 107 or 108 of the United States Copyright Law is paid. The appropriate remittance of $3.00 per page is paid directly to the Copyright Clearance Center Inc., 27 Congress Street, Salem, MA 01970.

Permission for other use: The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying.

The Item-Fee Code for this publication is: 0042-207X/87 $3.00 + .00

Subscription rates 1988

Annual institutional subscription rate (1988) DM 550.00 (including postage and insurance). Two-year institutional rate (1988/89) DM 1045.00. Personal subscription rate for those whose library subscribes at the regular rate (1988) DM 213.00. Prices are subject to change without notice.

Subscription enquiries from customers in North America should be sent to: Pergamon Journals Inc, Maxwell House, Fairview Park, Elmsford, NY10523, USA, and for the remainder of the world to Pergamon Journals Ltd, Headington Hill Hall, Oxford OX3 0BW, UK. Microform Subscriptions and Back Issues: Back Issues of all previously published volumes are available in the regular editions and on microfilm and microfiche. Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

Typeset by Cotswold Typesetting Ltd, Gloucester and printed in Great Britain by Aberdeen University Press

Contents

numbers 1/2

Hungarian – Austrian – Yugoslavian Third Joint Vacuum Conference, 7–9 October 1985, Debrecen, Hungary

AUTHORS		ARTICLES
J S Colligon	1	Introduction
M V Kurepa	3	High resolution electron spectroscopy—recent new achievements
W G Baechler	21	Cryopumps for research and industry
T E Madey	31	Mechanisms and applications of electron stimulated desorption in surface science
J S Colligon	35	Recent trends in surface treatment using ion beam processes
G Mezey, F Pászti, L Pogány, M Fried, A Manuaba, G Vizkelethy, Cs Hajdu and E Kótai	41	Surface deformation due to high fluence helium irradiation
H Winter	47	New developments in plasma edge diagnostics
D Berényi	53	Present experimental approach and some recent measurements in ion–atom collision research
M Gillet	61	Structure and CO adsorption of small crystals
M Krohn	67	Fundamentals and present state of surface decoration
L Füstöss	75	Monte Carlo calculations for gas flow through conical elements
I Berecz, S Bohàtka, Z Diós, J Gál, G Langer and J Molnár	79	Ion counting device with dead-time correction
E Kansky, M Jenko and R Tavzes	81	Mechanism and kinetics of vacuum chromizing of iron
I Berecz, S Bohátka, Z Diós, I Gál, J. Gál, L Kiss, R M Kovacs, G Langer, J Molnár, A Paál, K Sepsy, I Szabó and G Székely	85	A microprocessor-controlled quadrupole mass spectrometer gas analyser system
S Lugomer, M Stipančić and M Kerenović	89	Growth of Ta-oxide on thin tantalum films containing grain boundary particles
F M Reicha, M El Hiti and P B Barna	93	The effect of oxygen on the structure and growth morphology of vapour deposited Cu films
M El Hiti, P B Barna and F M Reicha	97	Structure and growth morphology of SiO_x films deposited on NaCl (001) faces
H Zorc	101	Optimum multilayer design selection in relation to production errors
L Tóth	103	A model of substrate surface roughness effect on the electrical properties of thin films
T Wiktorczyk and C Wesołowska	107	Dielectric properties of ytterbium and dysprosium oxide films deposited by electron beam evaporation
M Lubecka and A Węgrzyn	111	The diffusion of oxygen vacancies and electrical properties of EuO thin films doped with Eu
F Warkusz	115	Some transport properties of granular metal films with rough surfaces

E Schabowska-Osiowska, R Ścigała and Z Porada	119	Cr–SiO cermet thin films
L Köver, J Tóth and L Dávid	125	XPS investigation of Pt–Si interfaces formed during heat treatments in different (H_2, O_2) atmospheres
I Bertóti, M Mohai, M Révész and G Alexander	129	Surface composition of glasses: modifications induced by chemical and thermal treatments
G Mink, I Bertóti, I S Pap, M Mohai, T Székely and Tran Minh Duc	133	On the role of potassium additives in the chlorination of TiO_2 by CCl_4 and $COCl_2$
W Arabczyk and H-J Müssig	137	Nitrogen bonding states on iron studied by PES and AES
I Bertóti, G Mink, G Varsányi and T Székely	141	The influence of submonolayer silica on the surface properties of γ-alumina
M Behnke, A Herrmann, D Hildebrandt, H Grote, M Laux, P Pech, J Sachtleben, H Wolff, V M Chicherov and S N Svonkov	145	A surface analysis station for investigation of the near wall plasma of tokamak T-15
G Gergely	149	Angular corrections for determining the electron inelastic mean free path (IMFP) by elastic peak electron spectroscopy
E Balázs and G Varga	153	Distorted wave Born-approximation for atom–metal surface scattering (NDWBA)
H Düsterhöft and M Riedel	157	Energy distribution of secondary ions emitted from pure elements and amorphous alloys
L Kövér, J Tóth, I Cserny and M Róder	161	Surface layer structure analysis of stainless steel tubing used in LWR primary circuit—an ESCA study
M Murko-Jezovšek and F Brecelj	165	AES analysis of reed switch contact surfaces and gas chromatographic analysis of filling gases
A Zalar and S Hofman	169	Depth resolution of multilayer Cr/Ni thin film structures deposited on substrates with different roughness
L Kövér, J Tóth, J B Schág, I Borbély-Kiss, P B Barna, I Pozsgai and F Medve	175	Surface analysis of air pollutants collected in populated areas
Chr Edelmann	179	The use of the ion drift velocity for pressure indication in the rough vacuum range using a hot filament ionization gauge
R Riesenberg and G Schmidt	183	Black aluminium films

EXTENDED ABSTRACTS

O Geszti, L Gosztola and E Seyfried	187	Obliquely evaporated silicon oxide thin films studied by cross-sectional transmission electron microscopy
S Bohátka and G Szöőr	187	Advances of a quadrupole-Derivatograph thermoanalytical instrument

ABSTRACTS

W J van Ooij	189	Contributions of vacuum methods to the evolution of long-range R&D in industry
E Kansky	189	Vacuum tightness of materials and phase boundaries
N S McIntyre, W M Lau, D D Johnston and L L Coatsworth	189	Application of high resolution ESCA to surface oxidation studies
D A King	189	Clean and adsorbate induced phase transitions at metal surfaces
M Croset	190	SOI materials and technologies towards three-dimensional integration
S-E Karlsson, J-E Sundgren and H T G Hentzell	190	Hard coatings prepared by PVD and CVD
S Luby	190	Metallization films and systems for semiconductor devices and circuits: some problems and trends
G Tóth	190	The calculation of the vapour density and velocity distributions in the jet of diffusion pumps

J Szilágyi, S Bohatka, G Langer and Gy Sántha	190	Quadrupole mass spectrometric measurements in industrial fermentations
T Veszprémi, Gy Zsombok and L Nyulászi	191	A new uv photoelectron spectrometer for investigation of molecular electronic structures
S Träger	191	Thermic gas desorption method in testing light source components and other materials for vacuum engineering
J Šetina and R Zavašnik	191	Leak detection below 10^{-12} mbar l s^{-1} with spinning rotor viscosity gauge
É Biró and S Reznik	191	Mass spectrometric investigation of the gas desorption in light sources and electron tubes under pumping and operating conditions
D Rotar and E Kansky	191	Vacuum degassing of ceramic suspension for injection molding
J Karányi, Gy Vágó and M Szilágyi	192	Thickness homogeneity vs target erosion of Penning-type source
I Belényessy	192	Investigation of getter parameters of non-evaporating getters
I Berecz, S Bohátka, G Langer, J Mosolygó, A Nagy and G Tarr	192	Diffusion pump construction in ATOMKI
R Dobrozemsky, A Breth and G Schwarzinger	192	Calibration of gauges and mass spectrometers by defined gas bursts
G Gerth	192	Mass spectrometric study of silver adsorption on tungsten (110)
A Chrzastowski and H Jankowski	193	The deposition treatment influence on structure properties of amorphous metallic thin films
K Ehrig, U Ehrlich, G Gerlach and K Graef	193	Application of layer systems for optical components
D Katzer and G Sáfrán	193	Imaging of the microtopography of silicon 111 surface by gold decoration
A Banovec, K Požun and M Kern	193	Stability of sputtered NiCr thin films for strain gauge application
J Kispéter	193	Possibility of photocurrent oscillation in Se-thin-layers
H D Bauer and W Scholz	193	Quantitative thin film analysis by EELS
G Gergely and A Sulyok	194	Reflection electron energy loss spectroscopy (REELS) of some oxide films on substrates
L Bugyi and F Solymosi	194	Adsorption and decomposition of NO on potassium promoted Rh(111)
J Kiss and F Solymosi	194	Adsorption of H_2O and O_2 on Rh surfaces studied by AES, ELS and TDS
R Duś and E Nowicka	194	The nature of the adsorption states of hydrogen on surfaces of thin transition metal films
H Karner, M Luger, H P Steinrück, K D Rendulic and A Winkler	195	Adsorption properties of stepped surfaces
G Biczó	195	An SCF theory of surfaces, the intermediate electronic states and the quantum size effects
J Sárkány and M Bartók	195	Ir studies from the aspect of adsorbate-induced surface transition of Pt/SiO_2
Lj D Atanasoska, M M Ristić and W E O'Grady	195	Ruthenium oxide single crystal–titanium interface (110) and (100) surface; a study by means of LEED, AES and XPS techniques
A Berkó and F Solymosi	196	Interaction of CO_2 and HCOOH with Pd(100) surface
J Szuber	196	A small modified cylindrical mirror analyser with additional pre-retardation
E Gisler and E B Bas	196	Realization of a compact spectrometer for ISS and AES sputter depth profiling

L Füstöss, G Varga and E Balázs	196	The applicability of the hard corrugated potential wall in calculations of surface scattering
Lj D Atanasoska and A Zalar	197	AES and XPS studies of Cl^- ion penetration and the chemical composition of oxide films on aluminium
G Hetzendorf, S Hertl and P Varga	197	Surface compositional changes of Au–Pd binary alloys during temperature excursions and sputtering
J Pirs and A Zalar	197	Some results of investigations into relationship between a few elements of nodular graphite cast iron and nodular graphite
G Bauer and M Leisch	197	Composition and structure of passivated iron surfaces
K Ehrig, R Schlenk, M Falz, F Bigl, H Neumann and B Faust	197	Application of ion-beam etching in microelectronics
M Tasevski	198	Influence of crystal orientation on open circuit voltage and first diode factor at SIS solar cells
N G Dhere	198	Fabrication and characterization of thin films for solar cells

Vacuum 86: Vacuum Science, Technology and Applications, 25–27 March 1986, University of Strathclyde, Glasgow

AUTHORS		ARTICLES
J H Leck	249	Vacuum 86 Conference Issue: Dedicated to Professor John Yarwood in appreciation of his many years association with Vacuum
R K Fitch	251	Vacuum 86: Vacuum Science, Technology and Applications
E A Maydell-Ondrusz	253	Transient electron beam annealing of arsenic implanted silicon
R Lewin, R P Howson and C A Bishop	257	Optical coatings for large area interference filters
B L Weiss	261	Characteristics of optical waveguides formed in $LiNbO_3$ by He^+ implantation
Y Lifshitz and E Cheifetz	265	The influence of nitrogen pre-implantation on the properties of He implanted materials
A S Sahin, P L Jones, D King and D Moore	269	Observation of vapour species concentration during the growth of single crystal zinc selenide films by molecular beam epitaxy
D A O Hope, T I Cox and V G I Deshmukh	275	Langmuir probe and optical emission spectroscopic studies of Ar and O_2 plasmas
C A Bishop, G Edge, I Sutherland and R P Howson	279	Optical properties of tungsten oxide films as a function of their stoichiometry as determined by LIMA and XPS
M J Percy, R Amos and F C Robson	283	A novel frost-free throttle valve for sputtering applications
R E Thurstans and J Wolstenholme	289	Applications of microfocussed ion beams in surface and thin film analysis
Th Lindblad, L Bagge, J Bjon and S Levén	293	Experiences of a medium-sized uhv system for pressures below 10^{-11} mbar
H E Nuss	297	Space simulation facilities and recent experience in satellite thermal testing

K Parker	303	Some experiences of thermal vacuum testing of spacecraft mechanisms
G Duesing	309	The vacuum systems of the nuclear fusion facility JET
A M Poncet	317	Dealing with high gas loads in uhv systems: some recent developments at CERN (LEAR)
T Oversluizen, P M Stefan and M Iarocci	321	Practical notes on the construction and use of a uhv double-crystal monochromator for synchrotron radiation
T R Hull, J S Colligon and A E Hill	327	Measurement of thin film adhesion
A J Tugwell, D Hutson, C M Pegrum and G B Donaldson	331	Plasma processing of niobium for the production of thin-film superconducting devices
F M Mao, J M Yang, W E Austin and J H Leck	335	Residual gas analysers and their use in high vacuum systems
R J Reid and A P James	339	Characterization of a multiple head residual gas analyser installation on an electron storage ring
A P James	343	The ultra high vacuum (uhv) calibration facility at Daresbury Laboratory of the Science and Engineering Research Council (SERC)
J D Nuttall and D C Witt	347	An electrostatically-suspended spinning-rotor vacuum gauge: a feasibility study
G E Holmes and S J B Corrigan	353	Interactions of H_2O and O_2 with evaporated titanium gettered surfaces under uhv conditions
Jiann-Ruey Chen, Yean-Kuen Fang and Shun-Liang Hsu	357	Growth of tungsten silicide films by low pressure CVD method
A G Spencer, C A Bishop and R P Howson	363	The design and performance of planar magnetron sputtering cathodes
H Biederman	367	**BRITISH VACUUM COUNCIL ANNUAL ADDRESS 1986** Polymer films prepared by plasma polymerization and their potential application

EXTENDED ABSTRACTS

H Amed	375	Advances in high resolution and high throughput in electron beam lithography
B Ferrario	375	Use of getters in vacuum systems
P Bailey, D G Armour and G Sharples	377	Vacuum considerations in the design of low energy accelerators

ABSTRACTS

E D Erikson, T G Beat, D D Berger and B A Frazier	379	Vacuum outgassing of various materials
G Voss and S Burzynski	379	Mass spectrometer control system for beamline systems
H K Pulker	379	Recent trends in thin film thickness monitoring
E D Erikson, D D Berger and B A Frazier	380	A comparison of the outgassing characteristics of several solar absorbing coatings
K I Ajeel, H Kheyrandish and J S Colligon	380	Production of Bi/Sb thermojunction by ion beam mixing
L Dargel-Sulir and H Jankowski	380	Structural properties of molybdenum–nickel films prepared by rf bias sputtering
E Furman and Y Finkelshtein	380	Oxygen dependent SIMS yields in Al–Si–Mg alloy
